7. The use of attachments, including canning or ordinary jars, not recommended or sold by Cuisinart may cause fire, electrical shock, or risk of injury to persons.
8. Do not use outdoors.
9. Do not let cord hang over edge of counter or table or touch hot surfaces.
10. **Keep hands and utensils out of jar while blending, to reduce the risk of severe injury to persons or damage to blender itself.** A rubber or plastic spatula may be used but must be used only when the blender is turned off.
11. When blender is in On mode, and LED lights are flashing or glowing, do not touch cutting assembly, interfere with blade movement, or remove blender jar cover. Accidentally touching a speed button may activate the blender.
12. **BLADES ARE SHARP. HANDLE CAREFULLY.**
13. To reduce the risk of injury, never place cutting assembly on base unless the blender jar is properly attached.
14. Always operate blender with the cover in place.

ASSEMBLY

To use your Cuisinart® PowerEdge® 700-Watt Blender, begin by assembling the blender jar.

1. Turn the blender jar (a) upside down, and place it flat on a sturdy surface.

2. Position the rubber gasket (b) on the round opening on the bottom of the blender jar.
3. Turn the cutting assembly (c) upside down, and place the blade end in the blender jar opening.

Note: Blades are sharp... handle carefully.

4. Secure the rubber gasket and cutting assembly into position by placing the smaller opening of the locking ring (d) on top of the cutting assembly. Engage threads by twisting the locking ring clockwise until tightened. Make sure locking ring is tightly fastened to blender jar. Once assembled, turn the blender jar right-side up.
5. Push the cover on to the top of the blender jar. Make sure the triangle icon/symbol is aligned with the pour spout. Push the measured pour lid into the cover.
6. Place the blender jar on the motor base so that the jar markings are facing you and the handle is positioned to one side.
7. Plug in the power cord. Your blender is now ready to be used.

HELPFUL REMINDERS

- Once the cover is in position, additional ingredients can be added during blending by simply lifting the measured pour lid, adding ingredients, and replacing the measured pour lid.
- Cover should always be in place while the unit is on. Make sure the cover is properly aligned.

OPERATION

1. Place the motor base of your Cuisinart® PowerEdge® 700-Watt Blender onto a flat, sturdy surface. It is important that the surface be clean and dry. Assemble the blender by following the Assembly instructions. Once the jar is assembled and is in position on the motor base, plug the Cuisinart® PowerEdge® 700-Watt Blender into an electrical outlet.
2. Add all necessary ingredients to the blender jar, and replace the cover. Make sure that the triangle icon in the cover is aligned with the pour spout. This will ensure smoother lifting of the lid. You may add more ingredients by lifting the measured pour lid and dropping ingredients through the fill area. Replace the measured pour lid after adding ingredients. **Do not put hands in blender jar with blender plugged in.**

Note: To remove blender jar cover, lift edge of cover upward. Lifting measured pour lid will not remove cover.

3. **Start Blending:** Press the On/Off button. The red LED indicator light will illuminate and flash, indicating that the blender is turned on but no speed has been selected. This is Standby mode.
4. **Choose Blending Speed:** Press desired function to determine the speed at which you would like to blend the ingredients. The indicator light for the activated speed will glow. The blender will now be functioning at the desired speed. It is possible to switch speeds without pressing the On/Off button by simply pushing another speed button.

Note: The Count Up™ Timer will begin counting when the desired speed button is pushed. When you switch into a pre-programmed speed, the timer will reset to support the new command.

5. **Pulse Mode:** The Pulse mode allows you to create a burst of power for quick, efficient blending. To use the Pulse function, push the On/Off button and the red LED indicator light will flash. Push the Pulse button and the Pulse LED indicator light will blink. Push and release the desired speed button. Repeat as desired. While pulsing, the LED indicator Pulse light will remain solid while the function button is pressed. The Pulse function can be used to break apart larger pieces of food or to control the texture of food when chopping. The Pulse function is also effective in starting the blending process when you do not want continuous power, or when processing items that do not require an extended amount of blending.

Note: The timer will count when you push Pulse and hold down the function button. The timer will pause when you release the function button. It will reset if you press Pulse again.

6. **To reset the unit:** This appliance features an advanced resettable thermal fuse. In the event of an overload condition, the unit will shut down to protect the motor from overheating. To reset the appliance when this happens, unplug the unit and let it cool for a minimum of 15 minutes. Then, reduce the contents of the blender jar and/or clear any jams. Restart the unit as noted in the operating directions.

7. To Pause or Stop Blending Process:

- a) **To Pause Blending Process:** Push the button corresponding to the speed at which you are currently blending. For example: If you are blending on High speed, push the High speed button and the blender will stop blending but the unit will remain on.

Note: By pausing the blending process, you will also pause the timer. The timer will pause until you start blending again.

- b) **To Stop the Blending Process:** Push the On/Off button when you are finished with your recipe and would like to turn the blender off.

Note: When you push the On/Off button, to power the blender off the timer will stop counting and the LCD display will be off. When the blender is turned back on and a speed button is pushed, the timer will begin to count from 0:00.

8. **Timing Your Recipes:** The PowerEdge® 700-Watt Blender features a 3-minute Count-Up™ Timer so that you can time your recipes and guarantee perfect results. The timer begins counting from 0 as soon as you push your desired speed: High, Low, Pulse, Purée or Soups & Sauces. The timer will continue to count up even if you change speeds during blending. You can pause the timer by pausing the blending process. Do this by pushing the button corresponding to the speed at which you are currently blending. **For example:** If you are blending in Low speed and you push the Low speed button, the blender will stop blending and the timer will stop counting, but the unit will remain on. To continue blending and timing your recipe, push the function chosen again. The timer will also stop counting when it reaches 3:00 minutes, and an audible chime will sound. The blender will go into standby mode when the timed cycle is finished. The timer will reset itself when the On/Off button is pushed, a different speed is selected or a pre-programmed function is engaged.
9. **Pre-Programmed Recipes:** Smoothie and Ice Crush are both programmed based on extensive testing in our kitchen. **As part of their programming, the blender will pause between burst and cycles. This is normal and by design.**

- a) Start **Smoothie** by powering the unit On and pressing Smoothie. The LED backlight will illuminate and a 30-second count-up program will begin. Not smooth enough for your liking? After the cycle stops, the unit will go into standby. Press the smoothie button again to start a

new cycle. An audible chime will sound at the end of the cycle. You may stop the program at any time by hitting the Smoothie button again or by powering the unit Off.

- b) **Ice Crush:** From the Standby mode, press Ice Crush. A pre-programmed cycle will begin. It is designed to run for a 35-second cycle and will automatically stop at that point and an audible chime will sound. The blender will then go into standby mode. To start another cycle, press Ice Crush again. To interrupt the program, press Ice Crush and the unit will pause, reverting to Standby. To continue, press Ice Crush again. To stop the cycle, move to another setting or press On/Off.

Note: We recommend you use approximately 8 cubes per cycle.

10. **To Dislodge Food:** Use a rubber or plastic spatula to help remove food lodged around the cutting assembly. **DO NOT USE SPATULA UNTIL YOU HAVE TURNED THE BLENDER OFF.** Replace the cover and measured pour lid and continue blending, if necessary. Make sure spatula is not inside the blender jar before blending.
11. **When Finished Blending:** Press the On/Off button and unplug the blender from the electrical outlet. Never remove the blender jar from the motor base until the blender is off. Do not twist locking ring from blender jar when removing jar from motor base. Simply lift blender jar from motor base. **Do not put hands into blender jar with blender plugged in.**

CLEANING AND MAINTENANCE

Always unplug your Cuisinart® PowerEdge® 700-Watt Blender from the electrical outlet before cleaning. The blender is made of corrosion-resistant parts that are easy to clean. Before first use and after every use, clean each part thoroughly. Periodically check all parts before reassembly. If any part is damaged or blender jar is chipped or cracked, **DO NOT USE BLENDER.**

Remove the blender jar from the motor base by lifting straight up and away. Invert the jar. Twist off the locking ring by turning counterclockwise.

Remove the cutting assembly and rubber gasket. Wash in warm soapy water; rinse and dry thoroughly.

Place the locking ring in the upper rack of the dishwasher or wash in warm water.

CAUTION: Handle the cutting assembly carefully. It is SHARP and may cause injury. Do not attempt to remove blades from cutting assembly.

Remove the blender jar cover and the measured pour lid. Wash in warm, soapy water; rinse and dry thoroughly, or place in upper rack of dishwasher. The blender jar must be washed in warm, soapy water and rinsed and dried thoroughly. The blender jar can also be placed upside down in dishwasher.

Finally, wipe the motor base clean with a damp cloth to remove any residue, and dry thoroughly. Never submerge the motor base in water or other liquid, or place in a dishwasher.

Tip: You may wish to clean your blender cutting assembly as follows: Squirt a small amount of dishwashing liquid into assembled blender jar and fill halfway with warm water. Run on Low for 15 seconds. Repeat, using clean tap water. Empty blender jar and carefully disassemble parts. Wash cutting assembly, gasket and locking ring in warm, soapy water. Rinse and dry all parts thoroughly.

Any other servicing should be performed by an authorized service representative.

DOs and DON'Ts WHEN USING YOUR BLENDER

Do:

- Make sure the electrical outlet is rated at the same voltage as that stated on the bottom of the blender motor base.
- Always use the blender on a clean, sturdy and dry surface.
- **Always add liquid ingredients to the blender jar first, then add remaining ingredients. This will ensure that ingredients are uniformly mixed.**

-
- Cut most foods into cubes approximately ½ inch (1.3 cm) to 1 inch (2.5 cm) to achieve a more uniform result. Cut all cheeses into pieces no larger than ½ inch (1.3 cm).
 - Use the measured pour lid to measure liquid ingredients such as alcohol. Replace measured pour lid after ingredients have been added.
 - Use a rubber or plastic spatula as needed, only when the blender is turned off. Never use metal utensils, as damage may occur to the blender jar or cutting assembly.
 - Place cover on firmly. Always operate the blender with the cover on.
 - Make sure locking ring is tightly attached to blender jar.
 - Always remove locking ring, cutting assembly, and rubber gasket before cleaning.
 - When scraping the blender jar with a spatula, remove the food from the sides of the blender jar and place food in the center of the blender jar, over the cutting assembly.
 - When chopping fresh herbs, garlic, onion, zest, breadcrumbs, nuts, spices, etc., make sure the blender jar and cutting assembly are completely dry.
 - If food tends to stick to the sides of the blender jar when blending, pulse in short bursts.
 - Pulses should be short bursts. Space the pulses so the blades stop rotating between pulses.

Don't:

- Don't store food or liquids in your blender jar.
- Don't place cutting assembly and locking ring onto motor base without the blender jar attached.
- Do not attempt to mash potatoes, knead heavy dough, or beat egg whites.
- Don't remove blender jar while unit is on. Keep the blender jar cover on the blender jar while blending.
- Don't twist locking ring from blender jar when removing blender jar from motor base. Simply lift blender jar from motor base.
- Don't overprocess foods. Blender will achieve most desired results in seconds, not minutes.
- Don't overload blender. If the motor stalls, turn the blender off immediately, unplug the unit, and remove a portion of the food, then continue.
- Don't use any utensil inside the blender jar while the motor is on.
- Don't use any container or accessories not recommended by Cuisinart. Doing so may result in injury.
- Don't put hands inside the blender jar when blender is plugged in.

- Don't add boiling liquids or frozen foods (except ice cubes or ½-inch pieces of frozen fruit) to glass blender jar. Boiling liquids should cool for 5 minutes before being placed in blender jar.

RECIPE TIPS

The simple recipes that follow include some old Cuisinart® favorites as well as some creative combinations that are sure to please your friends and family. Thanks to the superior ice-crushing power and pre-programmability of the PowerEdge® 700-Watt Blender, you'll also be able to make delicious frozen drinks.

Chopping Nuts: Place ½ cup shelled nuts in the blender jar and cover blender. Pulse on High until desired chop is achieved. Pulse fewer times for coarsely chopped nuts. For best results process small amounts, ½ cup or less.

Bread, Cookie or Cracker Crumbs: Break or cut bread, cookies or crackers into pieces ½ inch or less in size. For best bread results, use day-old bread (drier bread works best). Place bread, cookie or cracker pieces in blender jar. Pulse on Low to chop, then blend continuously until desired texture of crumbs is achieved. For best results, process 1 cup or less at a time.

Crushing Ice: Add up to 8 standard ice cubes to the blender jar. Cover. Press the pre-programmed Ice Crush button. Timer will sound; turn blender off.

Grating Fresh Citrus Zest: For best results, blender jar and cutting assembly must be clean and dry. Remove zest from fruit in strips using a vegetable peeler; use a sharp knife to remove the bitter white pith from the underside of the zest. Process no more than 8 strips at a time (zest of 1 medium lemon). Cut strips in half. Add strips and 1 to 2 teaspoons of sugar or coarse salt (from recipe) to the blender jar. Cover blender jar. Set on High; blend for 15 to 20 seconds. Turn blender off.

Baby Food: Combine no more than 1 pound of cooked vegetables or fruit with ½ cup liquid (water, milk, fruit juice, broth, or cooking liquid) in the blender jar. Cover. Set on Purée. Blend until smooth. Add more liquid as necessary and process further until desired texture is reached. Always consult with your pediatrician/family physician concerning the best foods for your baby and when to introduce new foods to his/her diet.

Grinding Hard Cheese: Cut cheese into ½-inch pieces; remove the outer hard rind. Place cheese in blender jar and cover blender. Pulse on High to chop cheese, then blend until desired grind is reached. For best results, grind no more than 3 ounces of cheese at a time.

Grinding Spices: For best results, blender jar and cutting assembly must be clean and dry. Add ¼ to ½ cup of spices/seeds/peppercorns to blender jar. Cover. Pulse on High to break up, then blend until desired consistency is achieved.

Whipping Cream: If possible, chill blender jar and cutting assembly in refrigerator for 15 minutes. Add 1 cup heavy or whipping cream to blender jar. Cover jar. Set on High and blend until cream is thickened. (Do not overblend – bits of butter will begin to form.) If desired, add 1 tablespoon sugar and 1 to 2 teaspoons of vanilla or other flavoring. Consistency will be that of a thickened, but not fluffy, whipped cream and is most appropriate for topping desserts or coffee drinks.

When using the blender to purée hot mixtures such as creamed soups and baby foods, strain the solids from the liquid, reserving the cooking liquid. Then place the cooked solids in the blender jar along with ½ to 1 cup of the reserved cooking liquid. Use the Pulse function to chop, then blend until desired consistency/purée is reached.

Allow hot foods to cool slightly before blending to prevent steam buildup, which may cause the lid to lift up from the blender jar.

Keep your blender out on the counter within easy reach and you will be surprised how often you will use it.

Keep ice cubes made of juices, yogurt, milk or fruit purées on hand to substitute for plain ice when making smoothies and frosty beverages to prevent diluting the drink.

Welcome the fall and winter seasons with this flavorful soup. You get the smoothest results with our new Soup & Sauces function.

Makes about 6 cups

- ¼ cup extra virgin olive oil, divided**
- 2 pounds butternut squash, halved and seeded**
- 2 tablespoons unsalted butter**

- 1 onion, cut into 1-inch pieces**

Stir in the apples and sugar; sauté an additional 12 minutes, or until the apples are soft. Add the ginger and sauté until tender, about 3 to 4 minutes. Stir in the roasted squash, stock and spices.
